

North Boundary of T.22 S., R. 11 W.

CHAINS

which

A fir, 12 ins. diam., bears N.82*E., 33 lks.

dist., marked $\frac{1}{4}$ B T.

A hemlock, 10 ins. diam., bears S.46*W., 18 lks.

dist., marked $\frac{1}{4}$ B T.

80.78 The cor. to secs. 3, 4, 33 and 34.

Land, 52.50 chs. mountainous.

Soil, 3d and 4th rate; West 28.28 chs. marsh or tide land; soil 1st rate.

Timber, scattering fir, spruce, hemlock, alder, and willows. 80.78 chs.

Dense undergrowth of same and tule. 80.78 chs.

August 4, 1894.

I also found it necessary to resurvey the following lines in order to properly connect my subdivisional work with the exterior boundaries of the township.

Beginning at the cor. to secs. 3, 4, 33 and 34, I run East, bet. secs. 3 and 34, on the N bdy. of the tp.

Va.20*15'E.

At 40 chs. I find the $\frac{1}{4}$ sec. cor. bet secs. 3 and 34 to be S of my line, 52 lks. dist.

The cor. is a post, 3 ins. sq., marked $\frac{1}{4}$ S on N face, from which

A spruce, 12 ins. diam., bears N.34 $\frac{1}{2}$ *W., 36 lks.

dist., marked $\frac{1}{4}$ B T.

A spruce, 30 ins. diam., bears S.31 $\frac{1}{2}$ *E., 72 lks.

dist., marked $\frac{1}{4}$ S B T.

The true bearing of this line is therefore N. ^S9*15'W.,

instead of W and the length is practically the same as stated in the original notes.
