

Subdivisions of T. 21 S., R. 12 W.

CHAINS

Land, mountainous.
 Soil, 3rd rate.
 Timber, spruce, fir and hemlock.
 Undergrowth, sallow and salmonberry.

West, on true line bet. secs. 29 and 32.

31.30 To left bank of Umpqua River.

Set meander post, from which

An alder 4 ins. diam., bears North, 6 lks. dist.

An alder, 4 ins. diam., bears S.30*W., 6 lks.
 dist.

Land, same as last mile.

East, on random bet. secs. 28 and 33.

Var. 19*E.

40.00 Set temp. qr. sec. post.

80.52 Intersect S. 69 lks. from sec. cor.

S.89*30'W., on true line bet. secs. 28 and 33.

21.86 To right bank of Providence Creek.

Set meander post, no trees near.

Drove Iron Bolt $1\frac{1}{2}$ ins. diam. and 18 ins. long, raised
 mound with trench as per instructions.

Base, S. 100 lks. Angle opposite, 15*; distance 3.74chs.

25.60 To left bank. Set post, from which

A fir, 18 ins. diam., bears S.39*W., 221 lks. dist.

A spruce, 6 ins. diam., bears N.15*W., 176 lks.
 dist.

A party clearing land on both sides of this creek insists that it is not navigable there, being very little water in it at low tides, but as there is 5 ft. depth of water in it twice every day it is considered navigable up to a place where it becomes too crooked and narrow to be useful for that purpose.

The same objection is urged for like reasons and are similarly disregarded in case of the channel crossed at 25.00 chs. in E. bdy. of sec. 28.
