

Exterior Boundaries of T. 22 S., R. 11 W.

CHAINS

80.78 chs.

Dense undergrowth of same and tule, 80.78 chs.

Aug. 4, 1894.

I also found it necessary to resurvey the following lines in order to properly connect my subdivisional work with the exterior boundaries of the township.

Beginning at the cor. to secs. 3, 4, 33 & 34, I run East, bet. secs. 3 & 34 on the N. bdy. of the Tp.

Var. 20°15'E.

At 40 chs. I find the $\frac{1}{4}$ sec. cor. bet. secs. 3 & 34 to be S. of my line 52 lks. dist.

The cor. is a post 3 ins. sq., marked $\frac{1}{4}$ S on N. face, from which

A spruce, 12 ins. diam., bears N.34 $\frac{1}{2}$ *W. 36 lks. dist. marked $\frac{1}{4}$ S B T.

A spruce, 30 ins. diam., bears S.31 $\frac{1}{2}$ *E. 72 lks. dist. marked $\frac{1}{4}$ S B T.

The true bearing of this line is therefore N.79°15'W. instead of West, and the length is practically the same as stated in the original notes.

Aug.. 17, 1894.

Beginning at the $\frac{1}{4}$ sec. cor. on the N. bdy. of Sec. 6, T. 23 S., R. 11 W. which is a post 3 ins. sq. marked $\frac{1}{4}$ S. on N. face, from which

A myrtle, 14 ins. diam., bears N.2*E. 115 lks. dist. marked $\frac{1}{4}$ S B T.

A burnt fir, 50 ins. diam., bears S.72*E. 235 lks. dist. marked $\frac{1}{4}$ S B T.

I run East, on N. bdy. sec. 6,

Var. 19°40'E.

Over S. slope.
