

SUBDIVISIONS OF T. 22 S. R 12 W. W.M.

CHAINS

Ascend hill.  
 1.50 Spur N and S. Descend.  
 3.00 Ravine course N.20\*W. Ascend.  
 6.25 A spur, course N and S. Descend.  
 9.00 A stream 1 lk. wide, runs North.  
 9.90 Stream, 2 lks. wide, runs NW.  
 Ascend steep hill.  
 16.00 Top of Ridge N&S. +250  
 A Spruce, 40 ins. diam.  
 16.50 Descend.  
 35.45 Stream 2 lks. wide, course South.  
 Ascend gradually along South slope.  
 38.00 Descend gradually.  
 40.45 to  $\frac{1}{4}$  Sec. corner.  
 Land, mountainous and broken.  
 Soil, 2nd rate.  
 Timber, Fir, Spruce, Cedar, Hemlock, Maple and Alder.  
 Dense undergrowth of Salmonberry, Salal and Whortle-  
 berry.  
 Sand rock formation.

April 6th, 1891.

I now go to the corner to Secs. 19, 20, 29 and 30 and trace the line West between Secs. 19 and 30 without chaining.

I find a few old blazes for the first 10 or 12 chains but could find no marks farther West.

At the summit of the ridge NE and SW given in the field notes at 33.50 between Secs. 19 and 30 I begin to chain and at 6.50 chains I find the corner to  $\frac{1}{4}$  Section.

I find an Alder, 15 ins. diam., plainly marked  $\frac{1}{4}$  S B T on SW side, from which I run S.38\*W., 29 lks. to place of  $\frac{1}{4}$  section. Could find no post. The Alder bearing S.42\*W., 8 lks. has fallen but the  $\frac{1}{4}$  S is still visible on the trunk.
