

South Boundary of T. 23 S., R. 7 W., W. M.

CHAINS

A black oak, 10 ins. diam., bears S.17*E., 9 lks.
dist.

A black oak, 8 ins. diam., bears S. 5*E., 10 lks.
dist.

A white oak, 9 ins. diam., bears N.17*W., 16 lks.
dist.

A white oak, 5 ins. diam., bears N.28*E., 35 lks.
dist.

Va. 19*30'E.

This line passes over broken land. Timber fir and oak.
Undergrowth oak, hazel, Chaparell and Blackberries.
Soil first rate.

As rugged mountains and deep canyons set in a few chains
East of this point, it is impracticable to survey the
Eastern portion of this Township, it being unfit for
settlement or cultivation. That portion of the town-
ship which is North and West of this point, the S E.
corner of sec. 34, is mostly good tillable soil and
should be subdivided. Parts of it are well timbered
and a portion is good prairie, well adapted for
farming and grazing purposes.

The Umpqua river runs through this Township with its
many windings. It affords plenty of water for
navigation, but, on account of the rappid and falls
in the stream, it can never be made profitable except
for slack water navigation.

The river affords many good mill sites, while the
adjacent mountains are covered with first rate timber.

July 15th, 1857.
