

Meanders of Loon Lake

CHAINS

The lake is supposed to be about 300 ft. above sea level and the falls chiefly occur immediately below the lake, in one continuous rapid for about $\frac{1}{4}$ of a mile. The valley overflows above the lake at extreme high water. The bottoms are covered with the finest quality of myrtle and maple timber. All the lands at least valuable are included in these subdivisions.

Resurvey of the South Bdy. of T. 23 S., R. 10 W.
as surveyed by Elmer O. Worrick and Alonso Gesner,
Deputy Surveyors, Under Contract No. 659
Dated May 21, 1896

N.89*49'E., on South Bdy. of Sec. 33
