

## Subdivisions of T. 23 S., R. 10 W.

CHAINS

Set a fir post, 3 ft. long, 4 ins. sq., 24 ins. in the ground, for meander cor. of fractional secs. 2 and 11, marked M C on E., T 23 S on W., T 23 S R 10 W on S., and S 2 on N face, from which

A maple, 12 ins. diam., bears S.69\*W., 50 lks. dist. marked T 23 S R 10 W S 11 M C B T.

An alder, 10 ins. diam., bears N.60\*W., 4 lks. dist. marked T 23 S R 10 W S 2 M C B T.

An alder, 12 ins. diam., marked as described by the Surveyor General, stands South, 2.25 chs., and East, 1.77 chs.

This is described as marking the N bdy. of sec. 11, and as on line due W of meander cor. of frac. secs. 1 and 12, on E shore of the Lake.

I destroy all marks on this alder.

I make diligent search for the meander cor. bet. secs. 1 and 12, but can find no trace of same; a great slide off rock and debris has materially changed the shore line, and has doubtless destroyed the meander cor.

Land, mountainous.

Soil, 3rd rate.

Timber, fir.

Undergrowth, salal, vinempale, rhododendron, mountain-balm, manzanita, huckleberry, fir and hemlock.

Land, mountainous, heavily timbered or covered with dense undergrowth, 57.60 chs.

July 30, 1906.
