General Description

This Township is situated on the dividing watershed between the Umpqua and Coos Rivers.

It is high, extremely mountainous, mainly covered with heavy timber of fir, hemlock, cedar, madrone, chinquapin, and alder, with a dense and heavy undergrowth of little fir, hemlock, rhododendron, and salal with a heavy growth of poison ivy on the higher peaks.

Several peaks rise to a height of 3000 ft. above sea level. Green Peak lies in the S. $\frac{1}{2}$ Sec. 5, with an elevation of 3500 ft.

The soil ranges from 1st to 3rd rate.

It is well watered with springs and creeks.

Rocky ledges and rim-rocks are found all through the Township.

This rock is mainly sandstone with an outcropping of basalt on the higher peaks.

There are no indications of any mineral of any description nor of coal.

There are no towns or villages, and but three Settlers in
