

## Subdivisions of T. 27 S., R. 2 W.

CHAINS

September 8, 1882.

Most of this township is very high, rocky and broken. The South boundary of the township runs over mountains from 2 to 4000 feet high. The northern part of the township is lower and better land, being about 2nd and 3rd rate grazing and farming land. The whole of the township is covered with a dense growth of timber and underbrush. The different species of timber are Fir, Cedar, Hemlock and Sugar Pine, all of which is a fine quality for lumbering purposes. There are settlers in Secs. 3 and 7.

(omission - See pages 4884 $\frac{1}{2}$  - 4884 $\frac{3}{4}$ )

Subdivisions of T. 27 S., R. 2 W.  
As surveyed by Charles E. Roberts, U.S. Deputy Sur.  
Under Contract No. 759, dated October 26, 1904.

At the cor. of Secs. 1 and 12 on the range line which is a Basalt stone firmly set 5x6x8 ins. above the ground marked and witnessed as described by the Surveyor General.

Thence I retrace

West, between Secs. 1 and 12.

At 40.10 chs. fall 7 lks. North of the  $\frac{1}{4}$  Sec. cor. which is a post 3 ins. sq., 2 ft. high, marked and witnessed as described by the Surveyor General.

The course of the line from the Sec. cor. to the  $\frac{1}{4}$  Sec. cor. is S.89°54'W, length 40.10 chs. at 80.44 fall 90 lks. S. of the cor. of Secs. 1, 2, 11 and 12 which is a post greatly decayed, witnessed as described by the Surveyor General.

The course of the line from  $\frac{1}{4}$  Sec. cor. to Sec. Cor. is N.88°38'W., length 40.34 chs.

At the  $\frac{1}{4}$  Sec. cor. bet. Secs. 1 and 12 I set off 21°24'N., on the decl. arc and at 12, 5 m., 45 sec. P.M. l.m.t. observe the sun on the meridian the resulting lat is 43°15'.

July 16, 1905.
