| | Note: the last 2 $\frac{1}{2}$ miles were run for the purpose of taking in some small valleys heading East of the line run North through the center of the Township. East of this the land rises into high Oak hills cut up and broken by deep ravines, thence, into a mountain supposed to be nearly 3000 feet high. Believing it to be unfit for settlement, we thought it unnecessary to continue the survey further East. | |
