

Resurvey of Subdivisions of T. 29 S., R. 7 W.

CHAINS

44.01 Set a Cedar post, 3 ins. square, 3 ft. long, 24 ins. in the ground, for $\frac{1}{4}$ sec. corner, marked $\frac{1}{4}$ S 13 on N., and 24 on S., from which

A Fir, 18 ins. diam., bears N.14*E., 70 lks. dist.
Marked $\frac{1}{4}$ S 13 B T.

A Madrona, 24 ins. diam., bears S.24*W., 82 lks. dist.
Marked $\frac{1}{4}$ S 24 B T.

Land, mountainous.

Soil, stony, second and third rate.

Timber, Fir, Madrona, Cedar and Pine.

Undergrowth, Maple, Chinquapin and Willow.

Note: July 6, 1910: Sky overcast at noon; observation for latitude impossible.

July 6, 1910.

General Description

The fractional part of the township included in this survey is mountainous and covered with a belt of heavy timber and for the most part is covered with dense undergrowth. It is drained by Rice Creek and its tributaries. The soil along Rice Creek and other low lands is suitable for agricultural purposes.

The following settlers are located in the part of the township surveyed: D. B. Lewis, sec. 24: Charles Mulloy, sec. 24: Henry J. McCallister, sec. 24: William Partin and Ada Thorpe in secs. 26: Chas. Auer and C. S. Jackson, in sec. 36: The improvements of each of the above settlers consist of a cabin and a small clearing, each of the approximate value of \$200.00

Dated July 6, 1910.

Roy T. Campbell,

U. S. Deputy Surveyor.
