

## Retracement of Subdivision Lines of T. 30 S., R 2 W.

CHAINS	with dense undergrowth and exceptionally difficult to survey, 40.50 chs.
	August 26, 1909.
	At the cor. of secs. 15, 16, 21 and 22.
	Thence I run,
	West between secs. 16 and 21.
	Over mountainous land, heavily timbered and covered with dense undergrowth.
	Note- The "openings" noted by Dennis Hathorn, I now find to be very generally overgrown with young timber and brush.
	Gradually ascend SE. slope.
13.75	A Spring, flows, S.
27.00	Ridge bears N and S.
	Descend W. slope.
31.50	Bench on W. slope.
35.25	Leave bench.
40.44	The $\frac{1}{4}$ sec. cor. bears N 7 lks. dist. This cor. is a Fir, 18 ins. diam., and not a post as stated in the field notes. The SW. bearing tree is destroyed by fire. The other bearing tree and the cor. are deeply overgrown.
	I re-establish the cor. in its original position as follows:
	The original cor. a Fir 18 in. diam., for $\frac{1}{4}$ sec. cor.
	I mark $\frac{1}{4}$ S 16 on N and 21 on S side, from which,
	A Fir, 24 ins. diam., bears N.47 $\frac{1}{2}$ *W., 63 lks. dist. marked $\frac{1}{4}$ S 16 B T.
	A Cedar, 36 ins. diam. bears S'66 $\frac{1}{2}$ *W., 75 lks. dist. marked $\frac{1}{4}$ S 21 B T.
	The course of this line is N.89*54*W., and the distance is 40.44 chs.
	Land, mountainous.
	Soil, stony and loam, second and third rate.
