

Retracement of South Boundary of T. 30 S., R 9 W., W.M.

CHAINS

Dense undergrowth of madrone, laurel, hazel, vinemapple, live oak, cedar, rhododendron, mountain balm, hemlock and sallal, 80.12 chs.

Aug. 18, 1893.

Extracts from Subdivisions of T. 30 S., R 10 W., W.M.
Same Deputy, same Contract.

Preliminary to commencing the subdivisions of this Tp., I begin at the cor to Tps. 30 and 31 S., Rgs., 9 and 10 W. I run north on east boundary of sec. 36.

Va. 19°30'E., at 10:00 A.M.

40.00 Set temp. stake, I find two fir trees marked $\frac{1}{4}$ SBT. I find the $\frac{1}{4}$ sec. cor. lying upon the ground, considerably decayed, marked $\frac{1}{4}$ S. At cor. point, I set a stone, 14x10x9 ins., 9 ins. in the ground for $\frac{1}{4}$ sec. cor., marked $\frac{1}{4}$ on W face, from which

A Fir, 10 ins. diam., bears S.65°E., 7 lks. dist., marked $\frac{1}{4}$ S B T.

A Fir, 12 ins. diam., bears N.40°W., 26 lks. dist., marked $\frac{1}{4}$ S B T.

The Fir, 10 ins. diam., which bears S.65°E., 7 lks. dist., is dead. I therefore mark

A Cedar, 10 ins. diam., bears S.50°E., 24 lks. dist., marked $\frac{1}{4}$ S B T.

I now measure from $\frac{1}{4}$ sec. cor. east 7 lks. and intersect N and S line, 11 lks. north of temp. stake.

From $\frac{1}{4}$ sec. cor. I run North on east boundary of sec. 36 at 80.00 chs., I set temp. stake.

I find post. cor. to secs. 25, 30, 31 and 36 lying upon the ground, greatly decayed with surveyors marks on it but cannot distinguish them. I find three witness trees and the stump of one about 10 ft. high.
