

Survey of Fractional T.31 S., R. 7 W.,

CHAINS

The uplands are generally rolling and only fit for grazing purposes. It is well watered by clear running mountain creeks, good springs and Cow Creek, a creek of considerable importance running through Secs. 1 and 4.

Timber, chiefly fir and pine, cedar, laurel, oak, maple and ash, is well distributed.

There are two Settlements.

One, in the NE Quarter and the other in the SW Quarter of Sec. 4. Others I presume will soon be taken.

Gold is found along on the bars of Cow Creek, in sufficient quantities to justify their being worked.

The local attraction in this Township is so great that no reliance can be placed in the needle.

A peculiar mountain borders the North boundary of fractional Secs. 4 and 5. It being almost perpendicular on the South side, 1000 feet high, indented by fissures and caverns, being impossible to reach the summit from the South except in few places.

Exteriors of T. 32 S., R. 7 W.,
As surveyed by W.H. Byars, Deputy Surveyor,
Under Contract No. 420, dated Sept. 16, 1881.

From corner to Tps. 31 & 32 S., Rs. 6 & 7 W, which is a post, 2 ins. sq. 18 ins. above ground, marked.

T 31 S R 6 W S 31 on NE face, T 32 S S 6 on SE Face, T 32 S S 1, --- on SW face, T 31 S R 7 W S 36 on NW face, with six notches on each edge N,S,E and W from which

A Laurel, 16 ins. diam., bears N.78°E., 70 lks.

A Fir, 14 ins. diam., bears S.64°E., 58 lks.

A Laurel, 10 ins. diam., bears S.35°W., 53 lks.

A Laurel, 12 ins. diam., bears N.37°W., 98 lks.

I run

S. 89°30' W, on true line between Secs. 1 and 36.

Va. 18°E.
