

Retracement of Subdivisional Lines of T. 32 S., R. 5 W.

CHAINS

in place of the original decayed ones.
Land hilly and mountainous.
Soil, loamy and gravelly; 2nd and 3rd rate.
Timber, fir, cedar, pine, laurel.
Undergrowth, hazel, arrowwood, small firs.

August 22, 1901

At cor. of secs. 17, 18, 19 and 20, which, having disappeared, I set a pine post, 3 ft. long, 4 ins. sq., 24 ins. in the ground for cor. of secs. 17, 18, 19 and 20, marked T. 32 S. S. 17 on NE., R. 5 W. S. 20 on SE., S 19 on SW., and S. 18 on NW. faces with 3 notches on S., and 5 notches on E. faces, and witnessed as described by the surveyor general.

As this cor. is near the summit of a very high ridge, I am able to look S. across the Valley, to the E. side of a sawmill, nearly 2 miles S.; seeing the dividing fences very plainly, denoting the section line I find the line to be running, S.1*W.

Thence I run.

N.89*49'W. on a true line bet. secs. 18 and 19.

Ascend E. slope of mountain.

1.40 Summit of ridge, bears NW. and SE., 40 ft. above sec. cor., covered with large oak and laurel timber, bears N. and S.; begin descent.

20.60 Top of spur, bears N. and S.; 150 ft. below summit of ridge; begin a steep descent of W. slope.

31.10 A stream, 2 lks. wide, C. S., 200 ft. below top of spur; continue descent of hill, covered by oak timber, bears N. and S.

41.05 The $\frac{1}{4}$ sec. cor. having disappeared, I set a sandstone 12x10x10 ins., 8 ins. in the ground, marked $\frac{1}{4}$ on N. face,
