Land, mountainous 3rd rate.

Timber, good chiefly Fir, Pine, Cedar, Oak, Laurel and Yew.

Undergrowth, same and Balm.

May 17th, 1882.

GENERAL DESCRIPTION

This township contains nearly every variety of lands, found in the Western part of the State, from small rich valleys to high steep rocky mountains.

Soil of equal range generally however, of the 3rd order.

The North slopes of the mountains are generally covered with an abundant growth of valuable timbers chiefly, Fir, Pine and Cedar. The S Slopes generally are covered with Oak, Pine, and Laurel timbers of little value.

Deposits of Gold are found in many localities and are worked to advantage along Wolf Creek and its tributaries.

The Township is well watered, Wolf Creek furnishing an abundance of water power for manufacturing purposes. "Wolf Creek" is the name of a Post Office at the conjunction of Wolf and Cayote Creek, in Sec. 22, has a store, hotel, blacksmith shop and etc. Quite a number of settlers occupy lands in the old survey. There are two settlers in Sec. 5, two in Sec. 9, two in Sec. 20, two in Sec. 24, and one each in Secs. 19, 21 and 30.
