GENERAL DESCRIPTION

This township lies within the Umpqua National Forest and is very rough and mountainous, ranging in elevation from about 2400 ft. on Deep Creek in sec. 31 to about 5100 ft. above sea level at the lookout on top of Illahe Rock in sec. 34. The soil is a shallow rocky loam and owes its fertility to a mixture of vegetable mold.

One of the principle lookouts of the North Umpqua National Forest is located in the NE. part of fractional sec. 34, on top of Illahe Rock; which
