Land, mountainous.

Soil, rocky loam, 3rd rate.

Timber, fir, hemlock, yew, cedar and pine.

Undergrowth, vine maple, rhododendron, chinquapin,
salal and grease wood.

General Description.

This township lies with the Umpqua National Forest and is very rough and mountainous, ranging in elevation from 2,000 ft. near the $\frac{1}{4}$ sec. cor. of sec. 18 on the W. boundary to about 5,000 ft. above sea level on the south and north boundaries.

The soil is very shallow and rocky and owes its fertility to a mixture of vegetable mold. The township is covered with a dense growth of vine maple, rhododendron, chinquapin and hazel brush, and except for a few meadows there is no grass.
