record of the original survey. The retracement data are thoroughly verified and in the interest of simplicity only the true line notes are shown herein.

Most of the timber in the area involved in this resurvey was killed by a forest fire in the year 1939. At many corner points no living trees are found; no stone is available for corner accessories as a rule; and pits are of no value because the soil is loose and there is no sod. Consequently sound dead trees were marked for bearing trees.

Dependent Resurvey of Part of the South Boundary of
T. 21 S., R. 8 W.

"Reestablishment of the surveys executed by W. H. Byars, Deputy Surveyor, in 1874 and 1881."

I commence the dependent resurvey at the cor. of Tps. 21 and 22 S., Rs. 8 and 9 W., the locus of which is determined by reference to the record measurements from each of the old bearing trees.

At point for corner,

Set an iron post, 3 ft. long, 3 ins. diam., 28 ins. in the ground, for corner of Tps. 21 and 22 S., Rs. 8 and 9 W., with brass cap marked
