from which

A chinquapin, 8 ins. diam., bears N. 64° E., 9 lks. dist., mkd.  $\frac{1}{4}$  S35 BT.

A fir, 9 ins. diam., bears N. 63 $\frac{1}{2}$ ° W., 108 lks. dist., mkd.  $\frac{1}{4}$  S35 BT.

Land, mountainous. Soil, rocky clay. Timber, fir, hemlock, and cedar. Undergrowth, vine maple, salal, arrowwood, and hazel.

GENERAL DESCRIPTION

The area in the vicinity of the sec. line bet. secs. 1 and 2, T. 24 S., R. 7 W., ranges in elevation from about 800 ft. to 1,300 ft. above sea level. Slopes are steep, and in many places exposed. The soil is a rocky clay, on steep slopes, subject to heavy erosion during heavy rains.

All drainage flows in a southerly direction towards the Umpqua River, about  $\frac{1}{2}$  mile distant.

A road, unimproved, has been constructed for the removal of timber on the upper slopes, and terminates in the vicinity of the cor. of secs. 35 and 36, T. 23 S., R. 7 W. It is passable only during the dry season. Much of this area is closed to the public as the Fish and Wildlife Service have traps set to remove predators. Sheep are grazed on the open slopes.

The mean magnetic declination in this area is 20° E.
