GENERAL DESCRIPTION	
<p>The area covered by this resurvey lies in the Wolf Creek drainage approximately one mile south of Wolf Creek, Oregon. The land is mountainous with elevations ranging from 1,415 feet to 2,928 feet above sea level. London Peak, the highest point in the immediate vicinity, is on the west boundary of Section 27.</p> <p>The soil consists of a rocky clay, supporting a heavy growth of pine, fir, and madrone, with an undergrowth of hazel, arrowwood, and poison oak.</p> <p>U. S. Highway Number 99 runs adjacent to the east boundary of Section 27 and there are several access roads branching off to the west, giving good access to the area.</p> <p>No mineral deposits or dwellings were noted along the lines resurveyed.</p> <p>The average of a number of readings over all parts of Section 27, gives a mean magnetic declination of 19° 30' East.</p>
