

County Surveyor's Record, Douglas County, Oregon

Remonumentation of Certain Corners in T. 29 S., R. 6 W.

CHAINS

The $\frac{1}{4}$ sec. cor. of secs. 34 and 35, is monumented with an iron post, 1 in. diam., 10 ins. above ground, firmly set, with brass cap mkd. County Surveyors T29S R6W $\frac{1}{4}$ S34 S35 Office. The Douglas County records show that this monument was set by James W. Byron, Deputy County Surveyor, in 1956, at proportionate distance bet. the section corners.

At the corner point

Set an iron post, 28 ins. long, $2\frac{1}{2}$ ins. diam., 20 ins. in the ground, with brass cap mkd.

$$\begin{array}{c} \frac{1}{4} \\ \text{S } 34 \text{ | S } 35 \\ \text{T } 29 \text{ S | R } 6 \text{ W} \\ 1958 \end{array}$$

from which trees marked by Byron in 1956:

A sawed fir stump, 18 ins. diam., bears N. $48\frac{1}{2}^{\circ}$ E., 50 lks. dist., mkd. BT at base.

A fir, 14 ins. diam., bears N. $84\frac{3}{4}^{\circ}$ W., 41 lks. dist., mkd. T29S R6W $\frac{1}{4}$ S34 CS BT.

and a new bearing tree:

A fir, 40 ins. diam., bears S. $45\frac{3}{4}^{\circ}$ E., 60 lks. dist., mkd. $\frac{1}{4}$ S35 BT.

Bury the County Surveyor's monument alongside the iron post.

General Description

The portion of township 29 south, range 6 west, that was re-surveyed, lies in Douglas County, from three to seven miles south of the town of Dillard, Oregon. The land is drained by Willis, Rice and Kent Creeks and their tributaries. These streams flow northeasterly to the South Umpqua River. The sections resurveyed range in elevation from 700 to 2,800 feet above sea level. The land is mountainous with some tillable land in the bottom lands along the streams.

The area is timbered with fir, pine, cedar, oak, madrona, maple and chinquapin timber, with some hemlock, yew, cottonwood and alder being noted. The undergrowth is principally young timber, hazel, arrowwood, poison oak, scrub oak, vinemaple, blackberry, thorn, vines, ferns and grass. The timber and undergrowth vary from dense to widely scattering. Most of the area has been logged on the privately owned lands, with some virgin stands of timber remaining, principally on public lands. No mineral deposits were noted and no mining is carried on in the area surveyed. The land is valuable chiefly for the timber and grazing resources. A few small farms are located in sections 7 and 17.

The mean magnetic declination is $19\frac{3}{4}^{\circ}$ E., an average of several readings taken, which vary from $19\frac{1}{4}^{\circ}$ to 21° due to local attraction.
