

## County Surveyor's Record, Douglas County, Oregon

33

Remonumentation, Original Corner Points, T. 31 S., R. 8 W.

## CHAINS

The  $\frac{1}{4}$  sec. cor. of secs. 7 and 8, determined at record bearing and distance from the remains of the original bearing trees:

A rotted fir stump, 40 ins. diam., bears S.  $60^{\circ}$  E., 12 lks. dist., to face, no marks remaining.

A cedar, 17 ins. diam., bears N.  $65^{\circ}$  W., 21 lks. dist., mkd.  $\frac{1}{4}$  S on opened blaze.

At the corner point

Set an iron post, 28 ins. long,  $2\frac{1}{2}$  ins. diam., 22 ins. in the ground, with brass cap mkd.

$$\begin{array}{c} \frac{1}{4} \\ \text{S } 7 \text{ | } \text{S } 8 \\ \text{T } 31 \text{ S | R } 8 \text{ W} \\ 1962 \end{array}$$

from which new bearing trees

A fir, 13 ins. diam., bears S.  $65^{\circ}$  E., 42 lks. dist., mkd.  $\frac{1}{4}$  S8 BT.

A fir, 30 ins. diam., bears N.  $48^{\circ}$  W., 34 lks. dist., mkd.  $\frac{1}{4}$  S7 BT.

## GENERAL DESCRIPTION

The portion of township 31 south, range 8 west, that was resurveyed is located about 10 miles south of Camas Valley, Oregon. Most of the area is drained by tributaries of Cow Creek in a southeasterly direction. A small portion of the northwest part of the township is drained by Dice Creek into Twelvemile Creek. Elevations range from 1,500 feet to 4,000 feet above mean sea level.

The land is very mountainous throughout the township, Dutchman Butte being the highest point. The soil is rocky clay with some loam at lower elevations.

The timber consists of Douglas fir, hemlock, white fir, pine, cedar, madrone, maple, alder, yew, live oak, and Chinquapin. Approximately one-third of the land resurveyed has been logged. The undergrowth consists of vine maple, huckleberry, poison oak, live oak, salal, rhododendron, hazel, and reproduction.

Access is gained by several different roads: from Ten Mile, through Ollala, from Camas Valley, and from Riddle via Cow Creek Road to the West Fork Cow Creek Road. There are a number of logging roads extending throughout the township.

No mineral deposits were noted.

The average of a considerable number of readings over all parts of the area resurveyed gives a value of  $19^{\circ} 00'$  East for a mean magnetic declination. There is a range of  $1^{\circ} 00'$  in local attraction.
