

Subdivision of Sec. 20, T. 22 S., R. 4 W.

CHAINS

sea level near the southwest corner of section 20 to 1,300 feet above sea level near the northeast corner of section 9.

The area is drained in a southwesterly direction by Lees, Curtis, and Cox Creeks, to Elk Creek.

The soil is rocky clay and loam. A small portion of the land is being farmed at the present time, farms and ranches being scattered in the lower valleys. The timber is predominately Douglas fir, with stands of hemlock, cedar, maple, madrone, alder, dogwood, chinquapin, and oak. The undergrowth consists of salal, hazel, poison oak, huckleberry, blackberry, arrowwood, Oregon grape, vine maple, live oak, young timber, ferns and vines.

Access is gained by way of Interstate Highway No. 5 to the near vicinity. Private roads and a number of logging roads extend throughout the sections.

No mineral deposits were noted along the lines resurveyed.

The average of a considerable number of readings throughout the area gives a value of $20^{\circ} 15'$ E. for the mean magnetic declination with a range of $1^{\circ} 30'$ in local attraction.
