1.00	Spur, slopes N. 35° W.; desc. 390 ft. over SW. slope changing to W. slope.
20.255	The SW 1/16 sec. cor. of sec. 15.
	Descend 15 ft. over W. slope.
22.50	Creek, 3 lks. wide, course N. 40° W.; desc. 15 ft. along N. slope.
23.20	Dirt road, 15 lks. wide, bears NW. and SE.
30.00	Dirt road, 15 lks. wide, bears N. 25° W. and S. 25° E.
37.50	Leave timber, edge bears N. and S., enter cultivated field.
40.53	The S 1/16 sec. cor. of secs. 15 and 16.

GENERAL DESCRIPTION

The portion of township 22 south, range 6 west, which was resurveyed is located about 4 miles west of Drain, Oregon. The elevation ranges from about 200 feet on Elk Creek in the northern part of section 5 to 1,600 ft. above sea level on Allen Ridge near the southwest corner of section 22.

A majority of the private land has been logged. The north half of section 15 is nearly level bottom land and is being farmed by the local inhabitants. The land to the south is mountainous and suitable primarily for timber.

The timber is predominately Douglas Fir with stands of cedar, madrone, hemlock, maple, dogwood, chinquapin, alder, willow, oak, ash, and yew. The undergrowth consists of young timber, hazel, salal, poison oak, Oregon grape, vine maple, arrowwood, huckleberry, blackberry, manzanita, ferns and vines.

The area is drained by Elk Creek and its tributaries which flow westerly into the Umpqua River. The access is gained by way of State Highway No. 38 into section 15, from which private logging roads branch out to the southern part of the section. From Drain a well graveled logging road runs southwesterly to Allen Ridge.

There were no mineral deposits noted along the lines resurveyed.
