area is drained by a number of small streams which are tributaries of the Umpqua River. Elevations range from about 280 ft. above sea level, near the W 1/16sec. cor. of sections 8 and 17 to about 960 ft. above sea level in the interior of section 17.

Most of the eastern half of the section is either in prune and apple orchards or used to pasture sheep and cattle. Nearly all of the western half is forested with fir, hemlock, cedar, maple, alder, myrtle, chinquapin, oak, and madrone timber, with undergrowth of vine maple, salmonberry, huckleberry, hazel, arrowwood, poison oak, salal, Oregon grape, Scotchbroom, ceanothus, rhododendron, blackberry and fern.

Improvements noted in the section, other than roads, are the buildings and orchards of the Keith Kestersen farmstead.

No evidence of mineral was noted in the course of the resurvey. A number of readings throughout the area gives a mean magnetic declination of 20° 11' E., with a variation of 0° 10' in local attraction.
