

T. 22 S., R. 8 W., Willamette Meridian, Oregon

CHAINS

The history of surveys in that portion of township 22 south, range 8 west, Willamette Meridian, Oregon, covered by this resurvey is as follows:

Portions of the west boundary, subdivisional lines, and meander lines were surveyed by Harvey Gordon and Charles T. Gardner, in 1885-56, as shown on the official plat of survey approved February 20, 1856. The boundaries of the donation land claims were surveyed by Dennis Hathorn, in 1856, as shown on the official plat of survey approved December 23, 1859. The survey of approved August 20, 1875, and August 11, 1881.

The north half mile of the west boundary of section 19 and the line between sections 18 and 19 were resurveyed by George F. Rigby, in 1931, as shown on the official plat of survey approved January 31, 1933. A portion of the subdivisional lines were resurveyed by Floyd A. Brooks, in 1960, as shown on the official plat of survey accepted January 31, 1962. A portion of the subdivisional lines were resurveyed by Floyd A. Brooks, and James E. Jelley, in 1963-65, as shown on the official plat of survey accepted March 24, 1966.

Preliminary to the resurvey the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions, most corners were reestablished and remonumented at proportionate positions based on the original record. The retracement data were thoroughly verified and only the true line field notes are given herein. Only the lines bounding of crossing public lands were blazed.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and Special Instructions dated August 3, 1965, and Special Instructions dated September 26, 1967, under Group Nos. 595 and 657, Oregon.

The directions of lines were determined by the solar compass method.

The geographic position of the southeast corner of section 29, as scaled from the Elkton, Oregon, Quadrangle Map, prepared by the United States Geological Survey, in 1955, is as follows:

Latitude $43^{\circ} 37.2' N.$ Longitude $123^{\circ} 39.9' W.$

The mean magnetic declination is $20^{\circ} 23' E.$

Dependent Resurvey of a Portion
of the West Boundary of T. 22 S., R 8 W.,
Willamett Meridian, Oregon

(Restoring the 1874 and 1881 surveys by William H. Byars
and the 1931 dependent resurvey by George F. Rigby)

From the cor. of secs. 30 and 31 only, on the W. bdy.
of the Tp., monumented with an iron post, $2\frac{1}{2}$ ins. diam.,
firmly set, projecting 6 ins. above ground, marked and
witnessed as described in the official record of the
