

## County Surveyor's Record, Douglas County, Oregon

Dependent Resurvey, Portion of E. Bdy., T. 24 S., R. 2 W.

CHAINS

recorded by the Douglas County Surveyor, in 1966, from the bearing trees marked by Shaner:

A sawed fir stump, 28 ins. diam., bears S.  $50^{\circ}$  W., 113 lks. dist., with scribe marks  $\frac{1}{4}$  S24 BT visible on partially healed blaze. Shaner record, 110 lks.

A sawed fir stump, 60 ins. diam., bears S.  $82\frac{1}{2}^{\circ}$  W.,  $87\frac{1}{2}$  lks. dist., with scribe marks  $\frac{1}{4}$  S24 BT visible on partially healed blaze. (Shaner record, S.  $78^{\circ}$  W., 85 lks.)

The true corner point falls in the center of the spur of Rock Creek road where it is impracticable to establish a permanent monument. In 1965 the Douglas County Surveyor established and recorded a witness cor. which bears West, 0.303 chs. dist., monumented with an iron post 1 in. diam., protruding 5 ins. above ground, firmly set, with brass cap mkd.

 $\frac{1}{4}$  S 24 | WIT. COR.

R 2 W | 20 FT. E. TO COR.

1966

from which an accessory mkd. in 1966.

A cross chiseled on an exposed rock face, bears N.  $0\frac{1}{4}^{\circ}$  W.,  $18\frac{1}{2}$  lks. dist.

The witness cor. is located at the base of a vertical rock cut bank at the W. edge of the spur of Rock Creek Road.

Land, mountainous.

Soil, rocky clay.

Timber, fir, hemlock, cedar, yew, and dogwood; undergrowth, young timber, rhododendron, salal, huckleberry, vine maple, Oregon grape and fern.

## GENERAL DESCRIPTION

The land along the lines resurveyed is mountainous, with the elevation ranging from about 1750 feet above sea level up to about 2250 feet above sea level. The soil is rocky clay with numerous rock outcroppings. The timber is primarily Douglas fir, hemlock, cedar, yew, madrone, dogwood, and sugar pine. Undergrowth consists chiefly of young timber, vine maple, salal, huckleberry, rhododendron, Oregon grape and fern, with occasional patches of poison oak and manzanita. The area is drained by the Northeast fork of Rock Creek which flows southerly. Access is by way of a new spur of Rock Creek Road, which traverses along the Northeast Fork of Rock Creek.

No indication of mineral deposits were noted.

The average of several readings along the lines resurveyed gives a mean magnetic declination of  $19^{\circ} 07'$  East. There is a range of up to  $3^{\circ} 15'$  due to local attraction.
