- Ascend 160 ft. along S. slope, changing to SE. slope, through heavy timber and dense undergrowth.
- 13.00 Spur, slopes S. 40° W.; desc. 255 ft. over NW. slope.
- 19.25 The NW 1/16 sec. cor. of sec. 21.
- Descend 205 ft. over NW. slope.
- 28.20 Olalla Creek, 30 lks. wide, course N. 55° E.; asc. 185 ft. over E. slope; also leave timber; enter logged area edge bears same as creek.
- 32.25 County road, paved surface, 30 lks. wide, bears N.35°E. and S.35°W.
- 38.50 The N 1/16 sec. cor. of secs. 20 and 21

GENERAL DESCRIPTION

The lands included in the foregoing survey are situated about 6 miles southeasterly of the hamlet of Tennile, Ore. Access is by way of a paved county road which extends along Olalla Creek, and by several dirt roads branching from it.

The area is drained by several small creeks which flow westerly into Olalla Creek. Elevations range from about 745 feet above sea level at Olalla Creek on the line between sections 16 and 21, to about 1,680 feet above sea level on the ridge between sections 21 and 22.

Soil in the area is composed generally of rocky clay loam. The timber consists primarily of fir, with stands of cedar, pine, maple, madrone, oak, alder, and chinquapin; with undergrowth of vine maple, hazel, poison oak, ocean spray, fern, Oregon grape, huckleberry, and blackberry.

No evidence of mineral deposits were notes in the area resurveyed.

The average of a considerable number of readings throughout the area gives a value of 19° 30' E. from the mean magnetic declination. There is a range of 1° in local attraction.
