

14602 County Surveyor's Record, Douglas County, Oregon

T. 23 S., R. 10 W., Willamette Meridian, Oregon

CHAINS

The history of surveys of township 23 south, range 10 west, Willamette Meridian, Oregon, pertaining to this resurvey is as follows:

In 1879 William H. Byars surveyed the east boundary and subdivisional lines, as shown on the official plat of survey approved July 26, 1879.

Preliminary to the resurvey the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions, lost corners were reestablished and remonumented at proportionate positions based on the original record. The retracement data were thoroughly verified and only true line field notes are given herein. Only those lines bounding, or crossing public lands were blazed.

The resurvey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1947, and the Special Instructions dated September 27, 1967, under Group No. 658, Oregon.

The directions of the lines were determined by the solar transit method.

The geographic position of the southeast corner of section 13, as scaled from the Scottsburg, Oregon, Quadrangle map, prepared by the United States Geological Survey in 1955, is as follows:

Latitude 43° 33.6' N. Longitude 123° 48.9' W.

The mean magnetic declination is 19° 45' E.

Dependent Resurvey of a Portion of the E. Bdy.,
T. 23 S., R. 10 W., Willamette Meridian, Oregon

(Restoring the 1879 survey by William H. Byars)

Beginning at the cor. of secs. 13, 18, 19 and 24, on the E. bdy., of the Tp., determined at intersection of fences extending N., E. and W. This point has been used by local landowners for many years as the corner and is accepted as the best available evidence of the position of the original corner.

At the corner point

Set an iron post, 28 ins. long, 2½ ins. diam., 26 ins. in the ground, with brass cap mkd.
