

County Surveyor's Record, Douglas County, Oregon

14900

T. 22 S., R. 9 W., Willamette Meridian, Oregon

CHAINS

The history of surveys of that portion of township 22 south, range 9 west, Willamette Meridian, Oregon, covered by this survey, is as follows:

A portion of the subdivisional lines were surveyed by Harvey Gordon and Charles T. Gardiner in 1855, as shown on the official plat of survey approved February 20, 1856.

Donation Land Claims in the area were surveyed by Dennis Hathorn in 1856, prior to many of the subdivisional lines being extended into this portion of the township, as shown on the official plat of survey approved September 25, 1862.

William H. Byars surveyed a portion of the subdivisional lines in 1874, as shown on the official plat of survey approved August 2, 1875.

A portion of the subdivisional lines were surveyed or resurveyed by Alonzo Gesner and E. O. Worrick in 1894, as shown on the official plat of survey approved January 16, 1896.

The Donation Land Claims were resurveyed and intersections made with section lines by George S. Pershin in 1896, as shown on the official plat of survey approved March 25, 1897.

Preliminary to the resurvey the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions, lost corners were reestablished and remonumented at the proportionate or other positions based on the original record. The retracement data were thoroughly verified and only the true line field notes are given herein. Only lines bounding or crossing public lands were blazed. All lines not forming closures were chained twice to exclude error.

The resurvey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1947, and Special Instructions dated May 7, 1970.

The directions of lines were determined by solar transit methods.

The geographic position of the corner of sections 17, 18, 19, and 20, as scaled from the Scottsburg, Oregon quadrangle map, prepared by the United States Geological Survey, in 1955, is as follows:

Latitude $43^{\circ} 39' N.$ Longitude $123^{\circ} 48.2' W.$

The mean magnetic declination is $19^{\circ} 15' E.$

Dependent Resurvey of a Portion of the Subdivisional Lines,
T. 22 S., R. 9 W., Willamette Meridian, Oregon

(Restoring the 1855 survey by Harvey Gordon and Charles T. Gardiner, the 1874 survey by William H. Byars, the 1894 resurvey by Alonzo Gesner and E. O. Worrick and the 1896 resurvey by George S. Pershin)

From the cor. of secs. 17, 18, 19, and 20, perpetuated and recorded by the County Surveyor in 1961, monumented
