from which new bearing trees

A fir, 7 ins. diam., bears N. 54° E., 71 lks. dist., mkd. T30S R3W S16 BT.

A fir, 7 ins. diam., bears S. 85°W., 128 lks. dist., mkd. T30S R3W S20 BT.

Reset iron pipe alongside iron post.

Land, mountainous.

Soil, rocky clay.

Timber, fir, madrone, cedar, and oak; undergrowth, fern, poison oak, huckleberry, and vine maple.

GENERAL DESCRIPTION

The lands included in the notes of the foregoing survey are located about 6 miles east of Day Creek, Oregon. The area is drained by St. John Creek, and its tributaries. The elevation ranges from about 1100 feet above sea level at St. John Creek, to about 2240 feet above sea level near the 1/4 section corner of sections 16 and 21.

Access into the area is by way of St. John Creek Road which branches from State Highway Number 42.

Soil in the area is composed of sandy clay loam Timber consists of fir, madrone, cedar, and oak; with undergrowth of Oregon grape, Poison oak, vine maple, fern, and huckleberry.

There are no buildings or improvements, other than the gravelled logging roads in the area. No mineral deposits were noted during the course of the survey.

The average of a considerable number of readings throughout the area gives a value of 19° 20' E. for the mean magnetic declination. There is a range of 1 3/4° due to local attraction.
