

County Surveyor's Record, Douglas County, Oregon

15391

T. 26 S., R. 3 W., Willamette Meridian, Oregon

CHAINS

The following field notes are those of the dependent resurvey of a portion of the subdivisional lines and subdivision of section 26, township 26 south, range 3 west, Willamette Meridian, Oregon.

The history of surveys pertaining to this resurvey is as follows:

A portion of the subdivisional lines was surveyed by Addison R. Flint, Deputy Surveyor, in 1855.

A portion of the subdivisional lines in the southeast portion of the township was surveyed by Addison R. Flint and L. L. Williams, Deputy Surveyors, in 1871.

The survey of the subdivisional lines was completed by Samuel C. Flint, Deputy Surveyor, in 1882.

A portion of the subdivisional lines was resurveyed by C. Albert White, Donald R. Beck, and Patrick J. Reynolds, Cadastral Surveyors, in 1964.

Preliminary to the resurvey, the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions. Lost corners were re-established and remonumented at proportionate positions based on the official record. The retracement data were thoroughly verified and only the true line field notes are given herein. All lines not forming closures were measured twice to preclude error. Only those lines bounding or crossing public lands were blazed.

The survey was executed in accordance with the specifications set forth in the Manuals of Surveying Instructions, 1947 and 1973, and the Special Instructions dated March 10, 1972, and supplemental Special Instructions dated March 27, 1975, under Group Number 768, Oregon.

The directions of the lines were determined by deflection angles turned from azimuths obtained by direct solar observations.

The geographic position of the southeast corner of section 26, as scaled from the Glide, Oregon quadrangle map, published by the United States Geological Survey, in 1954, is as follows:

Latitude $43^{\circ} 16.3' N$. Longitude $123^{\circ} 0.5' W$.

The mean magnetic declination is $19^{\circ} 45' E$.

Dependent Resurvey of a Portion of the Subdivisional Lines, T. 26 S, R. 3 W., Willamette Meridian, Oregon

(Restoring the survey by Addison R. Flint,
Deputy Surveyor, in 1855,
the survey by Addison R. Flint and L. L. Williams,
Deputy Surveyors, in 1871
and the survey by Samuel C. Flint,
Deputy Surveyor, in 1882)
