CHAINS

East Fork of the Coquille River, Middle Fork of the Coquille River, Tenmile Creek, Muns Creek, and a number of their tributaries. The elevations range from about 1,600 feet above sea level near the corner of sections 4, 5, 32, and 33, on the south boundary of the township, to about 2,800 feet above sea level near the $\frac{1}{4}$ section corner of sections 7 and 8.

Access into the area is by way of a paved road, branching from Highway Number 42 at Tenmile, Oregon. There are a number of dirt roads throughout the area.

Timber in the area consists of fir, hemlock, cedar, oak, maple, myrtle, madrone, chinquapin, and alder; undergrowth of salal, Oregon grape, vine maple, poison oak, rhododendron, and fern.

The soil is composed of rocky clay loam, from a few inches to several feet in depth, overlying a sandstone bedrock with numerous rock outcroppings throughout the area.

No evidence of mineral activity was noted in the area covered by this resurvey.

The average of a considerable number of readings throughout the area gives a value of $19^{\circ} 30'$ E. for the mean magnetic declination. There is a range of $1^{\circ} 15'$ in local attraction.
