Timber, fir, cedar, hemlock, alder, chinquapin, madrone,
maple, pine, and oak; undergrowth, vine maple, hazel,
arrowwood, salal, Oregon grape, poison oak, rhododendron,
and fern.

GENERAL DESCRIPTION

The lands included in the foregoing resurvey are
located about 12 miles southwesterly of the town of
Riddle, Oregon. The area resurveyed is typical coastal
mountain terrain, with elevations ranging from about
1,250 feet above sea level near the ¼ section corner of
sections 15 and 16, to about 3,150 feet above sea level
near the corner of sections 13, 14, 23, and 24.

The area is drained by Iron Mountain Creek, Cow
Creek, Cattle Creek, and a number of their tributaries.

Access into the area is by way of Cow Creek Road,
Middle Creek Road, and a number of unimproved logging
roads.

The soil is rocky clay with some rock outcroppings
noted along the lines of the resurvey. The land is not
suited for agricultural use or for the grazing of cattle,
but supports an excellent growth of fir, hemlock, pine,
