CHAINS

The following field notes are those of the dependent resurvey of a portion of the east boundary, a portion of the subdivisional lines, a portion of the claim lines, and the subdivision of sections 9, 21, and 24, township 29 south, range 4 west, and a portion of the claim lines in township 29 south, range 3 west, Willamette Meridian, Oregon.

The history of surveys pertaining to this resurvey, is as follows:

The east boundary and a portion of the subdivisional lines were surveyed by Nathaniel Ford, in 1854.

A portion of the east boundary was retraced and a portion of the subdivisional lines and Donation Land Claims were surveyed by Dennis Hathorn, in 1857.

The east boundary was retraced and a portion of the subdivisional lines was retraced and surveyed by William H. Byars, in 1881.

A portion of the subdivisional lines was retraced and the survey completed by William F. Briggs, in 1899.

The east boundary was dependently resurveyed by Donald R. Beck, in 1964.

The survey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1947, Special Instructions dated June 12, 1940, for Group Number 255, Oregon, Special Instructions dated July 10, 1969, for Group Number 701, Oregon, and Special Instructions dated June 8, 1977, for Group Number 938, Oregon.

The directions of the lines were determined by the solar transit method and by direct solar observations.

Preliminary to the resurvey, the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions. Lost corners were reestablished and remonumented at proportionate positions, based on the official record. The retracement data were thoroughly verified and only the true line field notes are given herein. Only those lines bounding or crossing public lands were blazed. All lines not forming closures were measured twice.

The geographic position of the corner of sections 25, 26, 35, and 36, as scaled from the Dixonville, Oregon quadrangle map, published by the United States Geological Survey, in 1954, is as follows:

Latitude 43° 00.8' N. Longitude 123° 08.2' W.

The mean magnetic declination is 19° 00' E.

Dependent Resurvey of a Portion of the East Boundary,
