Remonumentation of Certain Original Corner Points,
T. 25 S., R. 1 W., Willamette Meridian, Oregon

CHAINS

From this point, a witness corner, established by Godfrey in 1962, bears North, 0.17 chs. dist., monumented with an iron post, 1½ ins. diam., firmly set, projecting 6 ins. above ground, with brass cap mkd. COUNTY SURVEYORS OFFICE T25S R1W WC S15 S14 10 FT S to ¼ COR 1962, from which the remains of a bearing tree mkd. by Godfrey:

A hemlock snag, 9 ins. diam., bears N. 66° W., 24 lks. dist., with scribe marks ¼ S15 CS WC BT visible on open blaze.

The ¼ sec. cor. of secs. 10 and 15, perpetuated and recorded by Milo E. Godfrey, Deputy County Surveyor, in 1962, monumented with the remains of the original corner tree, a hemlock stump, 10 ins. diam., no marks visible, from which the remains of the original bearing trees:

A sawed dogwood stump, 6 ins. diam., bears N. 5° E., 26 lks. dist., no marks visible.

A sawed hemlock stump, 17 ins. diam., bears S. 51° E., 28 lks. dist., with scribe marks 4 S15 BT visible on open blaze.

and the remains of a bearing tree mkd. by Godfrey

A sawed hemlock stump, 8 ins. diam., bears N. 25° E., 51 lks. dist., with scribe marks ¼ S10 CS BT visible on open blaze.

add reference monuments

An iron post, 28 ins. long, 2½ ins. diam., set 24 ins. in the ground, for a reference monument, bears North, 16½ lks. dist., with brass cap mkd. ¼ S10 RM 1978 and an arrow pointing to the corner.

An iron post, 28 ins. long, 2½ ins. diam., set 24 ins. in the ground, for a reference monument, bears S. 69° E., 8 lks. dist., with brass cap mkd. ¼ S15 RM 1978 and an arrow pointing to the corner.

GENERAL DESCRIPTION

The lands included in the foregoing survey are located in mountainous terrain, about 9 miles northeasterly of the community of Idleyld Park, Oregon. The area is drained by Rock Creek and its tributaries, and a number of smaller streams all flowing in a southerly direction to the North Umpqua River. Elevation ranges from about 1,400 feet above sea level at the East Fork of Rock Creek, on the west boundary of section 18, to about 4,300 feet above sea level on Mace Mountain on the line between sections 30 and 31. Numerous logging roads provide good access to all parts of the area.

The soil is generally rocky clay with numerous rock outcroppings and bluffs. Timber in the area consists of fir, hemlock, cedar, white fir, pine, maple, alder, chinquapin, madrone, and yew. The undergrowth consists of vine maple, rhododendron, huckleberry, poison oak, arrowwood, salmonberry, salal, Oregon grape, and fern.

No evidence of mineral deposits was noted in the area.

The average of a considerable number of readings over all parts of the area gives a value of 19° 30' E. for the mean magnetic declination. There is a range of up to 2° in local attraction.
