CHAINS

A madrone, 23 ins. diam., bears S. 81° W., 50 lks.
dist., with scribe marks 1/4 visible on opened
blaze.

A madrone, 36 ins. diam., bears N. 15° W., 10 lks.
dist., no marks visible.

and bearing trees mkd. by Mensch.

A fir., 11 ins. diam., bears N. 79° E., 29 lks.
dist., with healed blaze.

A fir., 16 ins. diam., bears N. 60° W., 3 lks.
dist., with healed blaze.

Corner is located on ridge, bears NE. and SW.

Land mountainous.

Soil, rocky clay.

Timber, madrone, oak, fir, cedar, maple, alder, and hemlock;
undergrowth, arrowwood, hazel, fern, vine maple, Oregon grape,
poison oak, and young timber.

GENERAL DESCRIPTION

The lands included in the foregoing survey are
located about eight miles southeasterly from the small town
of Tenmile, Oregon. Access into the area is by way of a paved
county road extending along Olalla Creek, and several dirt
roads branching from it.

The area is drained by Thompson Creek, flowing south-
westerly to Olalla Creek. Elevations range from about 1840 feet
above sea level at the 1/4 section corner of section 34 only,
to about 2080 feet above sea level at the corner of sections
34 and 34 1/2 only.

Soil in the area is composed generally of rocky clay loam.
Timber consists of fir, cedar, hemlock, pine, oak, maple, and
alder. The undergrowth is mainly arrowwood, hazel, vine maple,
poison oak, Oregon grape, huckleberry, blackberry, and fern.

There were no mineral claims noted along the line re-
surveyed.

The average of a number of readings along the line
resurveyed gives a value of 19° 30' E. for the mean
magnetic declination. There is a range of 1° due to local
attraction.
