T 30 S., R. 4 W., Willamette Meridian, Oregon

CHAINS

from about 800 feet above sea level near the 1/4 section corner of sections 14 and 23, to about 1920 feet above sea level at the corner of sections 25, 26, 35 and 36. Access is gained by way of South Umpqua Highway, Days Creek Road, and numerous other asphalt, gravelled, and dirt surfaced roads throughout the area. The area is drained by the South Umpqua River, Days Creek, and their tributaries.

The soil ranges from sandy loam along the river bottom to rocky clay in the higher elevations. The bottom lands along the South Umpqua River and Days Creek are either being used as cultivated land for grain crops or as open pasture for livestock. The mountainous areas are forested with fir, pine, madrone, alder, oak, hemlock, ash, cedar, yew, and willow. The undergrowth consists of poison oak, hazel, fern, Oregon grape, vine maple, arrowwood, salmonberry, blackberry, huckleberry, manzanita, thimbleberry, and young timber.

No evidence of mineral deposits were noted along the lines of this survey.

The average of a number of readings along the lines surveyed gives a value of 19° E. for the mean magnetic declination. There is a range of 0° 45' in local attraction.
