

County Surveyor's Record, Douglas County, Oregon

17447

T. 26 S., R. 3 W., Willamette Meridian, Oregon

CHAINS

yew, ash, oak, maple, madrone, chinquapin, and alder. Undergrowth consists of vine maple, fern, poison oak, rhododendron, salal, Oregon grape, wild rose, huckleberry, salmonberry, wild plum, arrowwood, hazel, manzanita, and young timber.

Access is gained by way of an asphalt surfaced road along Little River and a number of gravelled and dirt roads extending from it into the area.

There were no mineral deposits noted along the lines resurveyed. The land is valuable mainly for stands of timber except for small farms located in the river bottom.

The average of a number of readings throughout the area gives a value of $18^{\circ} 15'$ E. for the mean magnetic declination. There is a range of $2 \frac{1}{4}^{\circ}$ due to local attraction.
