

County Surveyor's Record, Douglas County, Oregon

T. 27 S., R. 3 W., Willamette Meridian, Oregon

17500

CHAINS

The following field notes are those of the dependent resurvey of a portion of the north and east boundaries, and subdivisional lines, and subdivision of section 1, Township 27 South, Range 3 West, Willamette Meridian, Oregon.

The history of surveys pertaining to this resurvey is as follows:

The north boundary of the township was surveyed by Addison R. Flint, U.S. Deputy Surveyor, in 1855.

A portion of the subdivisional lines was surveyed by Addison R. Flint and L. L. Williams, U.S. Deputy Surveyors, in 1871.

The east boundary of the township and the remaining subdivisional lines were surveyed by Samuel C. Flint, U.S. Deputy Surveyor, in 1882.

A portion of the north and west boundaries of the township and subdivisional lines was resurveyed and certain original corners were remonumented without survey by Harold D. Corbin, Cadastral Surveyor, in 1958.

A portion of the east boundary was resurveyed by Wayne L. Rogers, Cadastral Surveyor, in 1979.

A portion of the north boundary was resurveyed by Wayne L. Rogers, Cadastral Surveyor, in 1980.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated February 24, 1982, under Group Number 1093, Oregon.

The directions of the lines refer to the true meridian, as determined by deflections from azimuths obtained by direct solar observations.

Preliminary to the resurvey the lines of the original survey were retraced and search was made for all corners and other calls of the record. The retracement data were thoroughly verified and only the true line field notes are given herein. Only lines bounding or crossing public lands were blazed.

The geographic position of the corner of sections 1, 6, 7, and 12, on the east boundary of the township, as scaled from the Red Butte, Oregon, quadrangle map, published by the United States Geological Survey in 1955, is as follows:

Latitude $43^{\circ} 14.5' N.$ Longitude $122^{\circ} 59.4' W.$

The mean magnetic declination is $19^{\circ} 30' E.$

Dependent Resurvey of a Portion of the East Boundary,
T. 27 S., R. 3 W., Willamette Meridian, Oregon

(Restoring the survey by Samuel C. Flint in 1882, and
the remonumentation by Harold D. Corbin in 1958)
