

County Surveyor's Record, Douglas County, Oregon

17608

Dependent Resurvey of a Portion of the Subdivisional
Lines, T. 21 S., R. 4 W., Willamette Meridian, Oregon

CHAINS

A fir, 16 ins. diam., bears N. $44\frac{1}{4}^{\circ}$ W., 17 lks. dist., with scribe marks T21S R4W S15 BT visible on open blaze.

From this point, United States Geological Survey triangulation station "WARDS 2", bears S. $87^{\circ} 00'$ W., 39.71 chs. dist., monumented with a brass tablet, $3\frac{1}{2}$ ins. diam., firmly set in drill hole in solid rock, with top mkd. WARDS 1934.

Land, mountainous.

Soil, rocky clay.

Timber, fir, hemlock, cedar, oak, maple, alder, madrone, and chinquapin; undergrowth, vine maple, hazel, arrowwood, Oregon grape, salal, blackberry, wild rose, poison oak, and fern.

GENERAL DESCRIPTION

The lands included in the notes of the foregoing survey are located about four miles northeast of Curtin, Oregon. The area is drained by the tributaries of Martin Creek. Elevations range from about 1,120 feet above sea level at the corner of sections 13, 14, 23, and 24, to about 1,520 feet above sea level near the corner of sections 14, 15, 22, and 23.

Access into the area is by way of a private road through section 14 from Interstate No. 5.

Soil in the area is composed of rocky clay, varying from a few inches to several feet in depth, with a number of rock outcroppings and bluffs throughout the area.

Timber consists of fir, hemlock, cedar, oak, maple, alder, madrone, and chinquapin. The undergrowth is mainly vine maple, hazel, arrowwood, Oregon grape, salal, blackberry, wild rose, poison oak, and fern.

The area is valuable mainly **for its** timber and rock, with some agriculture in the southeast corner of section 14 and the northeast corner of section 23.

No mineral deposits were noted during the course of the survey.

The mean magnetic declination is 19° E., with a variation of 1° due to local attraction.
