

# County Surveyor's Record, Douglas County, Oregon

17870

Subdivision of Section 35.  
T. 30 S., R. 3 W., Willamette Meridian, Oregon

**CHAINS**

- 1.40 Descend over NW. slope, through heavy timber and dense undergrowth.
- 1.40 Water line, 4 ins. diam., buried, bears N. 25° E. and South.
- 2.40 Gravelled road, 20 lks. wide, bears N. 40° E. and S. 55° E.
- 6.05 Creek, 5 lks. wide, course N. 10° W.; asc. over broken NE. slope.
- 10.55 Spur, slopes S.; desc. over NW. slope.
- 21.15 Creek, 1 lk. wide, course N.; asc. over broken NE. slope.
- 40.89 The N 1/16 sec. cor. of secs. 34 and 35.

**GENERAL DESCRIPTION**

The lands included in the foregoing resurvey are located along the South Umpqua River about five miles southeasterly of Days Creek, Oregon. Elevations range from about 1,050 feet above sea level near the 1/4 section corner of section 19 only, to approximately 2,250 feet above sea level at the 1/4 section corner of section 35 only. Access is gained by way of State Highway No. 42, with numerous gravelled and dirt roads branching from it into the area.

The area is drained by the South Umpqua River, Lavadoure Creek, Bland Branch, Stouts Creek, and their tributaries.

Soil in the area ranges from sandy loam along the river bottom to rocky clay in the higher elevations. The bottom lands along the South Umpqua River are either being used as cultivated land for grain crops or as pasture for livestock. The mountainous areas are forested with fir, pine, madrone, alder, dogwood, ash, hemlock, oak, cedar, yew, maple, chinquapin, and willow. The undergrowth consists of poison oak, hazel, ferns, Oregon grape, vine maple, arrowwood, salal, salmonberry, manzanita, blackberry, wild rose, huckleberry, thimbleberry, and young timber.

No evidence of mineral deposits were noted along the lines of this survey.

The average of a number of readings along the lines surveyed gives a mean magnetic declination of 18° 00' E., with a range of 0° 45' in local attraction.
