## CHAINS

from which bearing trees mkd. by Popken

A cedar, 22 ins. diam., bears N. 79° E.,  
185 lks. dist., with healed blaze.  
(record, fir.)

A fir, 10 ins. diam., bears S. 42½° W.,  
76½ lks. dist., with healed blaze.  
(Record, cedar, S. 38° W.)

N. 88° 55' W., on the E. and W. center line of the SE 1/4  
of sec. 7.

Descend over broken NW. slope, through heavy timber and  
dense undergrowth.

13.85 Ravine, drains N. 15° W.; asc. over NE. slope.

16.55 Spur, slopes N; desc. over NW. slope.

19.985 The SE 1/16 sec. cor. of sec. 7.

Descend over NW. slope, changing to SW. slope.

39.97 The center S 1/16 sec. cor. of sec. 7.

## GENERAL DESCRIPTION

The lands included in the foregoing resurvey are located in mountainous country about five miles southeasterly of the community of Dixonville, Oregon. The elevation ranges from about 880 feet above sea level at the 1/4 section corner of sections 7 and 12 to about 1,920 feet above sea level near the E 1/16 section corner of sections 7 and 18.

The area is drained by the South Fork of Deer Creek and its tributaries. The soil consists of a rocky clay. The lands are forested with fir, hemlock, cedar, oak, maple, madrone, chinquapin, alder, ash, yew, and cherry. Undergrowth consists of vine maple, arrowwood, hazel, poison oak, salal, Oregon grape, ceanothus, rhododendron, heckleberry, salmonberry, wild rose, and, ferns.

Access is gained by way of an asphalt surfaced road along the South Fork of Deer Creek, and a number of asphalt surface, gravelled and dirt roads extending from it into the area.

There were no mineral deposits noted along the lines resurveyed.

The average of a number of readings gives a value of 18° 00' E. for the mean magnetic declination. There is a range of 1° 00' due to local attraction.
