S 33
1984

Thence S. 21° 45' W., along line 7-1, Lot 7.

2.50 Vincent Creek Bridge, concrete surface, 17 lks. wide, bears N. 80° W. and S. 80° E.

3.045 (201.0 ft.) Angle point No. 1, and place of beginning.

GENERAL DESCRIPTION

The lands involved in the foregoing field notes are located in Douglas County, Oregon. The land is very steep and mountainous with elevations ranging from about 250 feet above sea level along Smith River in section 33, to about 1260 feet above sea level in section 22 near the center 1/4 section corner. The soil is composed of a silty clay loam from a few inches to several feet in depth overlaying sandstone bedrock. The timber consists of fir, cedar, hemlock, maple, and alder. The undergrowth is primarily salmonberry, huckleberry, vine maple, salal, Oregon grape, poson oak, ferns and grasses.

Access into the area is by way of the Smith River Road, Vincent Creek Access Road, and the West Fork Smith River Road.

Vincent Creek Guard Station is situated in the SW¼NE¼ of section 33. No mineral activity was noted in this survey.

The average of a number of readings along the lines surveyed gives a mean magnetic declination of 19° E. with a range of ¼° due to local attraction.
