

County Surveyor's Record, Douglas County, Oregon

T. 22 S., R. 7 W., Willamette Meridian, Oregon

18065

CHAINS

The following field notes are those of the dependent resurvey of a portion of the north boundary (fifth Standard Parallel South), township 23 south, range 7 west, and a portion of the subdivisional lines and subdivision of sections 23 and 35, township 22 south, range 7 west, Willamette Meridian, Oregon.

The history of surveys pertaining to this resurvey, is as follows:

The Fifth Standard Parallel South was surveyed by Harvey Gordon and Charles T. Gardner, U.S. Deputy Surveyors, in 1855-56.

A portion of the subdivisional lines was surveyed by William H. Byars, U.S. Deputy Surveyor, in 1871.

A portion of the north boundary (Fifth Standard Parallel South), township 23 south, range 7 west, was resurveyed and the survey of the subdivisional lines of township 22 south, range 7 west was completed by Winfield S. Chapman and Carl S. Nicklin, U.S. Deputy Surveyors, in 1897.

A portion of the subdivisional lines was resurveyed and section 15 was subdivided by John M. Jelley and Donald R. Beck, Cadastral Surveyors, in 1965.

The survey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated May 23, 1983, and Supplemental Special Instructions dated December 12, 1983, under Group Number 1160, Oregon.

Preliminary to the resurvey, the lines of the original survey were retraced and a search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions. Lost corners were reestablished and remonumented at proportionate positions based on the official record. The retracement data were thoroughly verified and only the true line field notes are given herein. Only those lines bounding or crossing public lands were blazed. All lines not forming a closure were measured twice.

The directions of the lines were determined by deflections from azimuths obtained from direct solar observations and refer to the true meridian.

The geographic position of the center 1/4 section corner of section 35, as determined from a tie to U.S. Geological Survey station "BELL MOUNTAIN", is as follows:

Latitude 43° 36' 49.07" N. Longitude 123° 29' 42.61" W.

The mean magnetic declination is 18° 45' E.

Dependent Resurvey of a portion of the North Boundary
(Fifth Standard Parallel South),
T. 23 S., R. 7 W., Willamette Meridian, Oregon

(Restoring the survey by Harvey Gordon and Charles T. Gardner, in 1855-56, the resurvey by William H. Byars, in 1881, and the resurvey by Winfield S. Chapman and Carl S. Nicklin, in 1897)
