39.86	The center E 1/16 sec. cor. of sec. 22.
<p>From the S 1/16 sec. cor. of secs. 22 and 23, monumented with an iron post, 2½ ins. diam., firmly set, projecting 6 ins. above ground, with brass cap mkd.</p> <div style="text-align: center; margin: 10px 0;"> <p>S 1/16 S 22   S 23 1975</p> </div> <p>from which the bearing trees mkd. by Jelley</p> <p style="margin-left: 40px;">A fir, 15 ins. diam., bears N. 77° E., 20 lks. dist., with healed blaze.</p> <p style="margin-left: 40px;">A fir, 12 ins. diam., bears N. 41½° W., 25½ lks. dist., with healed blaze.</p> <p>S. 89° 14' W., on the E. and W. center line of the SE¼ of sec. 22</p> <p>Ascend over steep broken NE. slope, through heavy timber and dense undergrowth.</p>	
20.06	The SE 1/16 sec. cor. of sec. 22.  Ascend over steep NE. slope.
21.10	Top of steep slope; continue to asc. over a gentle NE. slope.
29.80	Ridge, bears N. 40° E. and S. 40° W.; desc. over broken NW. slope
40.14	The center S 1/16 sec. cor. of sec. 22.
<p><b>GENERAL DESCRIPTION</b></p> <p>The lands included in this survey are located in Douglas County, approximately four miles northwesterly from the town of Tenmile, Oregon.</p> <p>The area is drained by Tenmile creek, with numerous small and seasonal drainages flowing into it. The elevations range from about 800 feet above sea level at the ¼ section corner of sections 11 and 14, to about 3,000 feet above sea level at the corner of sections 2, 3, 10, and 11. Access into the area is via paved county roads with gravelled and dirt roads branching from them into the area.</p> <p>The soil is composed of rocky clay, with some exposed rock outcroppings in the higher elevations, and clay loam in the creek bottoms. The timber consists of fir, hemlock, cedar, pine, yew, maple, chinquapin, oak, walnut, ash, madrone, myrtle, alder, and cottonwood, with undergrowth of salal, fern, poison oak, vine maple, Oregon grape, hazel, rhododendron, arrowwood, blackberry, salmonberry, huckleberry, wild rose, and young timber.</p> <p>No evidence of mineral activity was noted in the course of the survey.</p> <p>The average of a number of readings taken throughout the area gives a value of 20° E., for the mean magnetic declination. There is a range of 3/4° due to local attraction.</p>
