from which the remains of bearing trees mkd. by Roseberry and Jelley

A fir snag, 14 ins. diam., bears N. 62½° E.,
213 lks. dist., with scribe marks ¼ S9 BT.

A madrone, 12 ins. diam., bears S. 72 3/4° W., 51
lks. dist., with healed blaze. (Record, 67 lks.)

and a new bearing tree

A pine, 7 ins. diam., bears S. 76° E., 17
lks. dist., mkd. ¼ S9 BT.

GENERAL DESCRIPTION

The lands included in the foregoing record are located approximately three miles north of the town of Canyonville, Oregon. Access into the area is via Gazley Road, with several dirt and gravelled roads branching from it into the area.

The area is drained by Morgan Creek and numerous other small and seasonal drainages flowing into the South Umpqua River. The elevtions range from 2000 feet above sea level near the corner of sections 9, 10, 15, and 16, to about 1600 feet above sea level near the ¼ section corner of sections 10 and 15.

The soil in the area is composed of a rocky clay. Timber consists of fir, cedar, pine, yew, alder, madrone, maple, chinquapin, and willow. The undergrowth is made up of vine maple, poison oak, ferns salal, Oregon grape, arrowwood, blackberry, hazel, huckleberry, salmonberry, wild rose, manzanita, and young timber.

There were no mineral deposits noted along the lines surveyed.

The mean magnetic declination is 19½° E., as shown on the official plat of survey accepted May 31, 1978.
