18374

Dependent Resurvey of a Portion of the Subdivisional Lines,
T. 31 S., R. 8 W., Willamette Meridian, Oregon

CHAINS

A double alder, 10 ins. diam., bears N. 60° W., 18
lks. dist., mkd. T31S R8W S3 BT on the bark.

GENERAL DESCRIPTION

The lands included in this survey are located in Douglas County, approximately 15 miles southwesterly from the town of Riddle, Oregon.

Access is via logging roads branching from County Road No. 164.

The drainage is southeasterly. The elevations range from 1200 feet to 2000 feet above sea level.

The soil is composed of rocky clay in the higher elevations and clay loam in the creek bottoms.

The timber consists of fir, hemlock, cedar, pine, yew, maple, chinquapin, oak, madrone, myrtle and alder, with undergrowth of salal, fern, poison oak, vine maple, rhododendron, arrowwood, blackberry, salmonberry, and huckleberry.

Recreational gold panning and dredging takes place in Union Creek.

The average of a number of readings over the area gives a value of 20° 00' E., for the mean magnetic declination, with a range of 1° due to local attraction.
