

# County Surveyor's Record, Douglas County, Oregon

Dependent Resurvey of a Portion of the Subdivisional Lines,  
 18653 T. 30 S., R. 4 W., Willamette Meridian, Oregon

**CHAINS**

39.575

Intersect the W. bdy. of T. 30 S., R. 3 W., true point for the closing cor. of secs. 12 and 13.

Set a brass tablet,  $3\frac{1}{4}$  ins. diam., with a  $3\frac{1}{2}$  in. stem, in a drill hole, flush with top of exposed bedrock mkd.

from which

A fir, 8 ins. diam., bears S.  $38\frac{1}{2}^{\circ}$  W., 235 lks. dist., mkd. T30S R4W S13 CC BT.

A rock outcrop, 8 ft. long, 3 ft. high, and 3 ft. wide, bears N.  $21\frac{1}{2}^{\circ}$  W., 44 lks. dist., mkd. X B0.

From this point, the Angle Point bet. secs. 13 and 18, bears S.  $0^{\circ} 16' 00''$  W., 18.000 chs. dist., hereinbefore described.

Land, mountainous.

Soil, rocky clay.

Timber, fir, pine, willow, madrone, and maple; undergrowth, poison oak, arrowwood, huckleberry, ferns blackberry, and young timber.

---

Subdivision of Section 13,  
 T. 30 S., R. 4 W., Willamette Meridian, Oregon

---

From the S  $\frac{1}{16}$  sec. cor. of sec. 13 only, on the E. bdy. of the Tp. S.  $89^{\circ} 40' 00''$  W., on the E. and W. center line of the S  $\frac{1}{2}$  of sec. 13.

Ascend over broken SE. slope changing to NE. slope, through scattering timber and moderate undergrowth.

13.40 Spur, slopes SE.; desc. over broken SW. slope.

30.15 Creek, 3 lks. wide, course S.  $10^{\circ}$  E.; asc. over SE. slope.

38.085 The S  $\frac{1}{16}$  sec. cor. of secs. 13 and 14.

---

GENERAL DESCRIPTION

The lands included in the foregoing survey are located in mountainous country in Douglas County, about three miles southeasterly of Days Creek, Oregon. The elevation ranges from about 1040 feet above sea level at the corner of sections 13, 14, 23, and 24, to about 2700 feet above sea level near the closing corner of sections 12 and 13 on the east boundary of the township.

The area is drained by Bland Branch, Hammon Creek, and numerous other small and seasonal drainages flowing southwesterly to the South Umpqua River. The soil is made up of a clay loam in the lower elevations and a rocky clay in the higher elevations. The timber consists of fir, pine, cedar, hemlock, madrone, oak, maple, alder, chinquapin, dogwood, ash, and cherry. The undergrowth is mainly salal, Oregon grape, manzanita, hazel, salmonberry, vine maple, poison oak, arrowwod, blackberry, huckleberry, ferns, and young timber.

Access is gained via gravelled and dirt roads branching from the South Umpqua River Highway and Days Creek Road.

No mineral deposits were noted along the lines resurveyed. The land is used mainly for farming and forestry.

The average of a number of readings in the area gives a value of  $18^{\circ} 15'$  E. for the mean magnetic declination. There is a range of  $0^{\circ} 30'$  due to local attraction.
